Subject: RE: SOT Session Proposal: Speaker Request

Attachments: SOT Proposal - Pesticide NAM for Reg RA - draft May 12_MMP.docx

Hi Max,

Given the focus is on neurotox now, I added text at the end to indicate that my presentation will include discussion of the DNT NAM battery using OPs as a case study. I also had a few other minor edits to the original text I provided. Hopefully this is sufficient, but let me know if there's anything else you would like me to change.

Thanks, Monique

Hello Monique,

Thanks a lot for your help on this! We are making a slight revision to make it more neurotoxicology-focused (see attached). Please send us your edits. We really appreciate it!

Thanks again and have a good week! Max

Hi Max,

Lapologize. This email got lost in the mix. I will try to get you an edited abstract by tomorrow.

Thanks,

Monique

Hello Monique,

Thanks again for sending us your abstract! I attached a revised full proposal for your reference.

| Since your talk is going to be at the last of the five and right before the panel discussion, would you mind elaborating on your perspectives on the future development of pesticide NAMs in your abstract? Also, would you mind specifying what case studies and examples you are going to discuss (e.g. the 16-OP DNT study)?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Hi Kathryn,

I've drafted the attached abstract. Please let me know if this is sufficient. Also, please note that I am not currently a SOT member. This may change over the course of this year, but I just thought I would let you know my current status.

Thanks,

## Monique

Неу,

Great! Yes. No problem about post-editing. Want to try to get something together ASAP but doesn't have to be final. As close to as possible is good so that we can get feedback on our draft proposal.

Cheers,

Kathryn

Hi Kathryn,

I should be able to do the presentation. I will do my best to get you a draft abstract by the end of the week. It can be edited at a later date though, right? It's unlikely that I can get an abstract cleared by management with such a short timeline.

Thanks,

Monique

Subject: SOT Session Proposal: Speaker Request

Hey Monique,

Hope you had a good SOT and didn't get too behind; I know I have lots of catching up to do! Max Leung and I are putting together a proposal for SOT 2022 (see attached) and would like someone from OPP to give a talk on NAMs use in risk assessment. Do you think you, or someone from your team would be willing to do this? If so, do you think you could give me an abstract by EOW (we want to do some pre-submission reviews)?

Cheers,

Kathryn Page, Ph. D., D. A. B. T. (She/Her/Hers)
